

Hot Tub Maintenance Checklist

Start-Up

- While hot tub is filling, add initial dose (375 ml per 1,000 L) of **Dazzle™ Stain & Scale 1** to cold water. Once full, start pump, operate with the aeration off and commence heating.
- Bring a water sample to your **Dazzle™** Retailer for water balance recommendations.
- Balance water according to your **Dazzle™** Retailer's recommendations.
- Allow water to circulate for 2 hours.
- Apply **Dazzle™ Amaze** per label directions (2 caps per 1,000 L). Ensure that the pump and filter are operating and leave the cover off for a minimum of one hour after application. Allow water to circulate for at least 15 minutes before proceeding to next step.
- Add initial dose of **Dazzle™ Botanical Cleanse** (3 caps per 1,000 L). Pour around the edges of the hot tub with the pump operating and the aeration off. Avoid adding **Dazzle™ Botanical Cleanse** when the sanitizer level is above 5 ppm.
- Apply chlorine or bromine to the hot tub. Use **Dazzle™ Bromine Granules** or **Chlorine Granules** to initially establish the residual. Fill your tablet dispenser with enough **Dazzle™ Bromine Tablets** or **Mini Chlorinating Tablets** to maintain a continuous level of 3.0 – 5.0 ppm through the week.
- Add initial dosage of **Dazzle™ Performance Plus** (200 g per 1,000 L). Apply through the skimmer or in front of the suction plate with the pump in operation and the aeration off.
- Add initial dosage of **Dazzle™ Nature Sheen** (20 ml per 1,000 L). Apply with the pump in operation and the aeration off. Run filter continuously until water clears. **Dazzle™ Nature Sheen** will agglomerate particulate into masses large enough to be filtered out. Watch filter closely and clean as required.

As Required

- Test sanitizer and pH level with **Dazzle™ Test Strips**. Add **Dazzle™ Bromine Granules** or **Chlorine Granules** to boost the sanitizer level should it fall below 3.0 ppm. Always maintain the bromine/chlorine reading between 3.0 – 5.0 ppm. The pH level should be maintained at 7.4 - 7.6.

Hot Tub Maintenance Checklist

Weekly

- Add regular weekly dosage of **Dazzle™ Stain & Scale 2** (1 cap per 1,000 L) to protect against metal staining and scale formation.
- Oxidize water with **Dazzle™ Amaze** (2 caps per 1,000 L) by broadcasting over water surface. Note: heavy bather load may require more frequent applications. Allow water to circulate for at least 15 minutes and leave the cover off for minimum 1 hour. Wait 15 minutes before moving to next step.
- Digest and remove organics with **Dazzle™ Botanical Cleanse** (3 caps per 1,000 L).
- Re-fill your tablet dispenser with enough **Dazzle™ Bromine Tablets** or **Mini Chlorinating Tablets** to maintain a continuous level of 3.0 – 5.0 ppm through the week.
- Add weekly dosage of:
 - Dazzle™ Performance Plus** (6½ caps per 1,000 L).
 - Dazzle™ Nature Sheen** (½ cap per 1,000 L).
- Brush, skim and vacuum. Remove filter cartridge and rinse with water from garden hose.
- Clean water line with **Dazzle™ Tub Cleanse**, if necessary.

Monthly

- Have water tested at your **Dazzle™ Retailer**. Adjust pH, total alkalinity, calcium hardness as required.
- Clean cartridge with **Dazzle™ Filter Cleanse** as per label directions.

Draining

- Clean entire hot tub including plumbing lines with **Dazzle™ Drain Prep**. Add as per label directions the day before draining.
- Drain hot tub and clean surfaces with **Dazzle™ Tub Cleanse**.
- Clean cartridge with **Dazzle™ Filter Cleanse** as per label directions.
- Clean cover with **Dazzle™ Cover Cleanse & Protect** as per label directions.

Note: Always add products directly to hot tub water with the pump running and the aeration off. Allow enough time between applications for the products to fully disperse in the water unless a specific time is given.
